

JAPANESE AMERICAN CULTURAL CENTER DESIGN LITTLE TOKYO, LOS ANGELES

The JACC Plaza, designed by Sanku Naguchi, is a competition of architecture, open space and sculpture. The plaza's symbolism links present to past generations with reference to shared tradition and culture. This design focuses on illustrating and educating the general public of the Japanese heritage and culture. The intent is to create a functional, logical and artistic design of a sculpture environment connecting Second and San Pedro Street to the building entries of the JACC, the Naguchi Plaza and the Artisan Theater. Special attention was given to the creation of spaces and subspaces representing different size seating areas, the redefinition of the building entries and the relationship between the spaces and sculptures. Existing design elements and vegetation have been incorporated in this design.

DESIGN OF A PRIVATE RESIDENCE PALOS VERDES, CALIFORNIA

CONCEPT STATEMENT

The purpose of this design is to create a backyard for a private residence in Palos Verdes, California.
The yard should be used for entertaining (not taking a drink) in the evening and enjoying the view.
The design features a pond with an island, accessible through a pedestrian bridge.
It also includes a garden, which offers room for about 10 - 15 people.
The plant material mainly consists of water-wise native plants and mature trees.

Shephard Summers Mountainview Residence Landscape Development Plans

General Planting Notes:

- The landscape contractor is responsible for specifying, sourcing, and installing all other site improvements prior to beginning landscape work.
- The general contractor is to provide subgrade if below hard surface plus minimum 1 foot.
- Landscape planting areas shall be free of debris and rocks larger than 2 inches in dimension.
- Topsoil with a minimum of 30% organic content shall be placed at a minimum depth of 4" in landscape planting areas.
- Topsoil shall be tilled into the existing subgrade to eliminate soil interface problems.
- All landscape planting areas receive a minimum of 2" medium fine loam soil.
- All plant materials are to conform to the American Association of Nurserymen, Standards for Nursery Stock, latest edition.
- Plant species substitutions are discouraged, if plant availability is a problem, contact the landscape designer for acceptable alternatives.
- If the site work is different or modified from what is depicted on the Landscape Plan, or post mail and/or debris are encountered, requiring changes to the Landscape Plan, contact the landscape designer for instruction.
- The contractor shall maintain and water plant material until owner's final acceptance. This includes:
 - all trees, 24" low and larger
 - all trees 15 gallon size or smaller
 - all shrubs, vines and ground cover 15 gallon or smaller
- Field a plan the location of trees and shrubs to avoid conflict with location of any utilities. Contact landscape designer if problems are encountered.
